**Only \$195!**  
**Small Office / Shop Program**

TARGET PEST has put together a programme of pest control specifically designed for offices and non-food retailers and workshops. Providing prevention and control of the sort of pest problems that would otherwise badly affect reputation and deter customers.

## Our Targets

Protection of your property, profit and reputation through:

Control, prevention and monitoring of:

- Flies
- Spiders
- Rats
- Mice

All businesses are at risk from the damage caused by pests. They deter customers, cause physical damage to buildings, contents, wiring, health and of course reputations.

For the small office and shop, the risk to productivity through staff illness, down time due to pest damage and the loss of business through poor public perception can be very serious.

The TARGET PEST Small Office / Shop Program will, help you comply with hygiene regulations and will protect your business from financial loss and loss of goodwill. By the time you notice pests present on your premises some damage may already have been done.

Stay one step ahead of your competitors, be seen to be clean.
